Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirement, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a pharmaceutical company that has 3,000 users in offices across North America.

- * Microsoft OneDrive for Business
- * Azure Active Directory (Azure AD)
- * Azure AD
- * dynamic group membership

Microsoft Skype for Business

Contoso has an on-premises deployment of Microsoft Skype for Business Server 2015. All the latest cumulative updates are installed on all the servers. The following services are used in Skype for Business Server 2015:

- * Meetings
- * PSTN calling
- * Instant messaging (IM)
- * Federation to external companies

Departments

Contoso has the following departments:

- * IT
- * Sales
- * Human resources (HR)
- * Research and deployment (R & D)

All groups are created by using dynamic group membership that use the department attribute.

Requirements

Business goals

Contoso identifies the following business goals:

- * Migrate the maximum number of users to Microsoft Teams.
- * Minimize administrative effort.

Device requirements

Contoso identifies the following device requirements:

- * Replace Skype for Business IP phones with Microsoft Teams phones.
- * All Microsoft Teams phones must be set to lock automatically after 60 seconds.

Meeting and Live Event Requirements

Contoso identifies the following meeting and live event requirements:

- * Requirement1: Guest users must be able to join live events.
- * Requirement2: Guest users must always wait in a meeting lobby.
- * Requirement3: Contoso users must always bypass the meeting lobby when they join by using the Microsoft Teams client.
- * Requirement4: After the upgrade to Microsoft Teams, all meetings must be scheduled by using Microsoft Teams.

Calling Requirements

Contoso identifies the following calling requirements:

- * Migrate all existing auto attendants and response groups to Office 365.
- * Minimize the on-premises PSTN infrastructure.

Technical Requirements

Guest users must be prevented from making private calls.

Security Requirements

Contoso has the following security requirements for the Microsoft Teams deployment:

- * The number of ports allowed on the company's firewall must be limited.
- * Team names must be prevented from containing the name of any products produced by Contoso.
- * Users in the R & D group must be prevented from sending chat messages to users in other departments.
- * To meet the company's compliance policy, users in the sales department must continue to use on-premises Skype for Business for IM and calling only.

Pilot Project

Contoso begins a pilot project for the upgrade to Microsoft Teams.

You identify the following issues during the pilot project:

- * Microsoft Teams users report that they often receive continuous notifications from the Microsoft Teams client for 20 minutes.
- * Two pilot users in the HR department report that they are not members of the HR team.

Overview

General overview

Litware, Inc. is an international manufacturing company that has 4,000 users. The company has the following four departments:

- * IT
- * HR
- * R & D
- * Sales

Physical locations

Litware has two main offices. The offices are located in New York and London.

All offices connect to each other by using a WAN link. Each office connects directly to the Internet.

Existing environment

All user accounts have an Azure Active Directory Premium Plan P1 license.

Litware has a Microsoft 365 subscription that has Office 365 Enterprise E3 licenses for all users. All the E3 products and services are enabled for each user.

Litware uses Microsoft Skype for Business Online.

Requirements

Planned Upgrade

Litware identifies the following requirements for a planned upgrade from Skype for Business Online to Microsoft Teams:

- * Provide high quality audio, video, and online meeting experience for Microsoft Teams end users.
- * Implement a data retention solution in Microsoft Teams.
- * Minimize costs and administrative effort.
- * Use the principle of least privilege.

For the sales department, Litware plans to create a team that dynamically updates its membership when users leave and join the department.

Department Upgrade Requirements

Litware plans to implement upgrade requirements for the departments as shown in the following table.

| Department name | Requirement |
|-----------------|---|
| Sales | <p>Must use Microsoft Teams and Skype for Business.</p> <p>Must receive incoming chats and calls by using the same client that initiated the communication.</p> |
| HR | <p>Must use Microsoft Teams for collaboration and meetings.</p> <p>Must maintain Skype for Business as the preferred client for chat and calling.</p> |
| IT and R&D | <p>Must use only Microsoft Teams for chat, meetings, calling, and collaboration.</p> |

Microsoft Teams Requirements

All teams must meet the following requirements:

- * Only users in a partner company that uses a domain named fabrikam.com must be able to collaborate in teams by using guest accounts.
- * Only users in the compliance department of Litware must be able to create teams.

Planned Network Tasks

Litware identifies the following network validation tasks:

- * An administrator named Admin5 must be able to review the required bandwidth to support audio conferencing, video conferencing, and screen sharing in Microsoft Teams.
- * An administrator named Admin6 must be able to review network issues that cause poor call quality reported by users.

Data Retention Requirements

Litware identifies the following data retention requirements:

- * Requirement1: All messages in team collaborations must be deleted after seven years.
- * Requirement2: all files used in team collaborations must be retained for five years.
- * Requirement3: All files used in personal chats must be retained for five years.

Device Requirements

You provide Microsoft Teams-certified IP phones to users in the IT and R & D departments.

Each device must meet the following requirements:

- * The time zone on the phones used by the R & D department must be set to UTC-8.
- * The time zone on the phones used by the IT department must be set to UTC-5.
- * All phones must lock automatically after 60 seconds of inactivity.

Voice Pilot Requirements

Litware wants to pilot Phone System as a calling solution for 20 IT department users. The pilot project will receive phone numbers from Microsoft Teams.

Collaboration and Meeting Requirements

Litware identifies the following collaboration and meeting requirements:

- * Cloud recording must be disabled for all Microsoft Teams meetings organized by users in the HR departments only.

* Meeting email invitations must be customized to include the Logo URL, Legal URL, and Help URL of Litware.

Allow guest access in Teams is set to Off.

The Microsoft Viva Connections app is deployed to all users.

A Datum identifies the following issues:

- * An executive at the San Diego office reports that video drops during Teams meetings.
- * The Edmonton field site has limited bandwidth, and users report poor audio during Teams calls and meetings.
- * Users in the project management department report that they cannot give or take control during Teams calls and meetings while sharing their VDI desktop.

A Datum plans to implement the following changes:

- * Configure the media bit rate settings for the users at the Edmonton field site. The settings must apply only to the users while they are at the site, but NOT when they are at a different office.
- * Create a Teams channel to enable the project management department to collaborate with the IT department on a device upgrade project.
- * Implement a pilot rollout of Operator Connect for the users in the New York office. A port request was accepted already.
- * Create a Teams channel for the marketing department for external collaboration.
- * Rename the Viva Connections icon as Start portal.

A Datum identifies the following technical requirements:

- * The marketing department requires that all the files shared by using Teams remain available for at least three years after deletion.
- * The marketing department must be able to apply a watermark to content and video shared during Teams meetings.
- * All users require indefinite access to training videos recorded in Teams by the IT department
- * All access to Teams and shared resources must use the principle of least privilege.
- * Guest access must remain disabled.

과제 7

캐나다의 431 또는 343 지역 번호에서 전용 Microsoft 다이얼인 브리지 번호를 획득해야 합니다.

Answer:

See the solution in the explanation below:

Explanation:

To acquire a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada, you need to use the Teams admin center to request and assign a service number. A service number is a type of phone number that can handle hundreds of simultaneous calls and is used for services such as audio conferencing, auto attendants, and call queues. Here are the steps to follow:

- * Sign in to the Teams admin center with your Microsoft 365 username and password 1 .
- * In the left navigation, go to Voice > Phone numbers.
- * Click Add (+) and then select New service numbers.
- * In the New service numbers pane, select the country or region as Canada, the number type as Toll or Toll-free, and the location as Manitoba (for 431 area code) or Ontario (for 343 area code).
- * Enter the quantity of numbers that you need and then click Next.
- * Review your order details and then click Submit request.
- * Wait for an email confirmation that your request has been processed. This may take up to 24 hours.
- * After you receive the confirmation email, go back to the Teams admin center and click Refresh on the Phone numbers page. You should see the new service numbers that you requested.
- * To assign a service number to your audio conferencing bridge, go to Meetings > Conference bridges and then click Edit next to Default toll or toll-free number.
- * In the Edit default toll or toll-free number pane, select one of the new service numbers that you acquired from the drop-down menu and then click Apply.

Now, you have acquired and assigned a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada.

과제 12

팀과 채널을 관리할 수는 없지만 Teams Phone 구성을 관리할 수 있는 TeamsAdmin이라는 Microsoft 365 그룹을 만들어야 합니다.

Answer:

See the solution in the explanation below:

Explanation:

To create a Microsoft 365 group named TeamsAdmin that can manage Teams Phone configurations without being able to manage teams and channels, you need to use PowerShell to create the group and assign the Teams Communications Administrator role to it. Here are the steps to follow:

* Install the Azure Active Directory PowerShell for Graph module by running the following cmdlet:

```
Install-Module -Name AzureAD
```

* Connect to Azure Active Directory by running the following cmdlet and entering your Microsoft 365 username and password:

```
Connect-AzureA
```

Create a new Microsoft 365 group named TeamsAdmin by running the following cmdlet:

```
New-AzureADMSGGroup -DisplayName " TeamsAdmin " -Description " Group for managing Teams Phone configurations " -MailEnabled $false -MailNickName " TeamsAdmin " -SecurityEnabled $true -GroupTypes " Unified "
```

* Get the object ID of the new group by running the following cmdlet:

```
Get-AzureADMSGGroup -Filter " DisplayName eq ' TeamsAdmin ' "
```

* Copy the object ID from the output and assign it to a variable, such as \$groupID, by running the following cmdlet:

```
$groupID = " your-object-i
```

Install the Microsoft Teams PowerShell module by running the following cmdlet:

```
Install-Module -Name MicrosoftTeams
```

* Connect to Microsoft Teams by running the following cmdlet and entering your Microsoft 365 username and password:

```
Connect-MicrosoftTeams
```

* Get the role ID of the Teams Communications Administrator role by running the following cmdlet:

```
Get-CsOnlineRole -Identity " Teams Communications Administrator "
```

* Copy the role ID from the output and assign it to a variable, such as \$roleID, by running the following cmdlet:

```
$roleID = " your-role-id "
```

* Assign the Teams Communications Administrator role to the TeamsAdmin group by running the following cmdlet:

```
New-CsOnlineRoleAssignment -SecurityGroupId $groupID -RoleDefinitionName $roleID
```

Now, you have created a Microsoft 365 group named TeamsAdmin that can manage Teams Phone configurations without being able to manage teams and channels. You can add members to this group by using the Azure Active Directory admin center or PowerShell.

과제 3

'US Sales'라는 이름의 팀에 부서 속성이 'Sales'로 설정된 모든 사용자가 자동으로 포함되도록 해야 합니다. 다른 사용자는 팀에 속해 있으면 안 됩니다.

Answer:

See the solution in the explanation below:

Explanation:

To ensure that a team named US Sales automatically contains all the users that have the department attribute set to Sales, you need to create a dynamic team based on Azure AD group dynamic membership rules. Here are the steps to follow:

* Create a new team in Microsoft Teams as you would to create a normal team. Name it US Sales. If the team already exists, you can skip this step.

* Sign in to the Azure portal with your admin credentials.

* Go to Azure Active Directory > Groups. Find the group that corresponds to the US Sales team and select it.

* On the group details page, select Properties on the left menu and change the membership type to Dynamic user. Click Save.

* On the same page, select Dynamic membership rules on the left menu and add an expression that dynamically retrieves the users that have the department attribute set to Sales. In this case, the expression is `user.department -eq " Sales "`. Click Save.

That's it. You have successfully created a dynamic team for US Sales. This means that only users with the department attribute set to Sales will be added or removed from the team automatically. You can also modify the expression to include other criteria, such as location, job title, or manager.

과제 5

사용자가 이미 Teams 통화 중이거나 Teams 회의에 참여 중일 때는 Teams 통화 알림이 수신되지 않도록 설정해야 합니다. 솔루션에서 통화를 거부해서는 안 됩니다.

Answer:

See the solution in the explanation below:

Explanation:

To prevent incoming Teams call notifications when users are already on a Teams call or in a Teams meeting, you can use the Teams admin center to enable the Mute notifications during meetings and calls option. This option will suppress the incoming call notifications without rejecting the call. The caller will still hear the ringing tone and the callee can still answer the call from the Teams app or the taskbar. Here are the steps to enable this option:

* Sign in to the Teams admin center with your Microsoft 365 username and password 1 .

* In the left navigation, go to Teams > Teams update policies.

* Select an existing policy or create a new one by clicking Add.

* In the Update policy pane, under Meetings and calls, turn on the toggle for Mute notifications during meetings and calls.

* Click Save and then Close.

Note: You can assign different update policies to different users or groups of users. For more information, see Manage update policies in Microsoft Teams 2 .

과제 2

Allan DeYoung의 Teams 회의 초대장에만 먼저 토론토의 다이얼인 브리지 번호를 표시하고, 그다음 초대장 본문에 Paris의 다이얼인 브리지 번호를 표시하도록 구성해야 합니다.

Answer:

See the solution in the explanation below:

Explanation:

To configure the Teams meeting invites of Allan DeYoung to show a dial-in bridge number in Toronto and then a dial-in bridge number in Paris, you can use the Teams admin center to set the phone numbers included on his invites. Here are the steps to follow:

- * Sign in to the Teams admin center with your Microsoft 365 username and password 1 .
- * In the left navigation, go to Users and then select Allan DeYoung from the list of users.
- * In the user details page, go to Meetings and then click Edit next to Audio Conferencing.
- * In the Audio Conferencing pane, under Phone numbers, select Customized from the drop-down menu.
- * In the Customized phone numbers box, enter the phone numbers that you want to include on Allan's invites, separated by commas. For example, you can enter:
+1 416-555-1234 (Toronto), +33 1 55 55 55 55 (Paris)
- * Click Save and then Close.

Now, when Allan DeYoung schedules a Teams meeting, his invites will show the Toronto and Paris dial-in bridge numbers in the body of his invites, in the order that you specified.

과제 11

사용자가 다음 작업을 수행할 수 있는지 확인해야 합니다.

- * Teams 통화와 Teams 회의를 녹음합니다.
- * Teams 통화와 Teams 회의를 필사합니다.

Answer:

See the solution in the explanation below:

Explanation:

To ensure that users can perform the following actions:

- * Record Teams calls and Teams meeting.
- * Transcribe Teams calls and Teams meeting.

You need to do the following:

- * Turn on the recording and transcription settings in the Teams admin center. This will allow users to start and stop recording and transcription during a meeting or call. The recording and transcription will be stored in OneDrive or SharePoint and available in the meeting chat or channel conversation. For more details, see Record a meeting in Microsoft Teams .
- * Turn on the transcription and captions settings in the Teams admin center. This will enable automatic transcription and captions for meeting recordings. Users can play back the recordings with closed captions and review the transcript in the Recording & Transcripts tab in Teams. For more details, see Configure transcription and captions for Teams meetings .
- * Turn on the live transcription settings in the Teams admin center. This will allow users to view live transcription during a meeting or call. Users can also download the transcript after the meeting or call.

For more details, see View live transcription in Microsoft Teams meetings .

과제 6

레드먼드 마이크로소프트 웨이 1번지에 위치한 귀사 본사에 가상 접수원을 구성해야 합니다. 솔루션은 다음 요구 사항을 충족해야 합니다.

- * 회사명으로 검색하려면 1번을 눌러 회사 디렉토리로 이동하세요.
- * 회사 주소를 들으려면 전화를 건 사람은 0을 눌러야 합니다.
- * 고객에게는 항상 동일한 메뉴를 제공해야 합니다.

Answer:

See the solution in the explanation below:

Explanation:

To configure a virtual receptionist for your company's main office, you can use the Teams admin center to create and assign an auto attendant. An auto attendant is a voice menu system that allows callers to be transferred to an extension or a queue without speaking to an operator or receptionist. Here are the steps to create and assign an auto attendant that meets your requirements:

- * Sign in to the Teams admin center with your Microsoft 365 username and password.
- * In the left navigation, go to Voice > Auto attendants.
- * Click Add (+) to create a new auto attendant.
- * In the Basics tab, enter a name and an optional description for the auto attendant, such as "Main Office Receptionist".
- * Under Phone number, select Assign and then choose a service number from the list or click Add new number to get a new one. A service number is a type of phone number that can handle hundreds of simultaneous calls and is used for services such as audio conferencing, auto attendants, and call queues.
- * Click Apply and then Next.

- * In the Greeting and menu tab, under Greeting, select Custom and then click Upload audio file to upload a recorded greeting message for the callers, such as "Welcome to Microsoft. Please listen carefully to the following options."
 - * Under Menu options, click Add (+) and then select Key press from the drop-down menu.
 - * In the Key press box, enter 1 and then select Dial by name from the Action drop-down menu. This will allow callers to press 1 for the company directory to lookup by name.
 - * Click Add (+) again and then select Key press from the drop-down menu.
 - * In the Key press box, enter 0 and then select Play audio file from the Action drop-down menu. This will allow callers to press 0 to hear the company address.
 - * Click Upload audio file and then upload a recorded message with the company address, such as "Our main office is located at 1 Microsoft Way, Redmond."
 - * Under Menu options, turn on the toggle for Repeat menu until caller hangs up or presses #. This will offer the same menu at all times.
 - * Click Next.
 - * In the Business hours tab, under Business hours, select 24/7 from the drop-down menu. This will make the auto attendant available at all times.
 - * Click Next.
 - * In the Review tab, review your settings and then click Save.
- Now, you have configured a virtual receptionist for your company's main office that meets your requirements.
